

Dr. Jorge Torres, Trusted Pediatric Dentist, Invites New Patients for Gentle Laser Frenectomy Treatments in Brandon, FL

Dr. Jorge Torres and his team of pediatric dentists now accept new patients for laser dentistry in Brandon, FL. Dr. Torres is experienced in providing laser-based frenectomy procedures that decrease recovery time and provide a more comfortable experience for patients.

Brandon, FL ([PRWEB](#)) March 29, 2016 -- Patients in need of frenectomy procedures are now invited to schedule an appointment with Dr. Torres for [laser dentistry in Brandon, FL](#). When compared to other available treatment options, laser frenectomy procedures are less painful and easier to perform. They also facilitate a quicker recovery time so patients can get back to their normal lives more quickly.

It is not uncommon for young patients to experience problems with two muscular attachments in the mouth called the frena. One frenum is responsible for connecting the upper lip to the gums while the other is responsible for connecting the tongue to the floor of the mouth. In some cases, children may be born with frena that do not function properly, limiting natural movements of the lip or tongue which may cause discomfort. A frenectomy treats the problem by carefully removing the affected frenum. Traditional dental tools are often used for this procedure, but Dr. Torres offers gentle laser procedures that reduce treatment time, provide a more comfortable experience and decrease the subsequent recovery period.

Dr. Torres uses the advanced BIOLASE WaterLase® laser to perform gentle and effective frenectomies. The laser utilizes a combination of laser energy and water to penetrate soft tissue with remarkable precision. Dr. Torres sees reduced bleeding, discomfort and swelling during and after treatment in patients who receive laser treatment compared to traditional methods. Due to the unique way in which the laser seals the treatment site, stitches are not as often required and risk of infection is minimized.

Parents who have a child in need of a frenectomy are invited to schedule an appointment with Dr. Torres for a laser based treatment solution. [Laser dentistry](#) appointments in Brandon, FL may be scheduled by calling Dr. Torres' practice at (813) 321-4432. More information can also be found at www.pedodentbrandon.com.
